

MARINE AGGREGATES IN CONSTRUCTION

THAMES BARRIER PARK

BACKGROUND

The Thames Barrier Park is a 14-hectare (34.6-acre) park in London's docklands, named after its location on the north side of the River Thames next to the Thames Barrier. It is intended to aid the regeneration of the area by creating an attractive public space alongside residential and commercial developments.

CONSTRUCTION NOTES

Marine aggregates were used in all the concrete mixes for this project including foundations and walls.
