

# MARINE AGGREGATES IN CONSTRUCTION

## BEXHILL TO HASTINGS LINK ROAD

## BACKGROUND

The 5.6km, £113 million link road, is aimed at regenerating the most deprived area in the south east. The road will open up access to land for housing, business development, and employment opportunities. The road is expected to significantly reduce traffic and improve air quality.

The road will open in Summer 2015.

## CONSTRUCTION NOTES

Approximately 15,000m<sup>3</sup> of marine aggregate/concrete will be used.

### CONSTRUCTION CATEGORY

Structural concrete

### USAGE CATEGORY

Transport infrastructure

## CASE STUDY 21

This case study forms part of a library of case studies demonstrating the successful use of marine aggregates in construction
