Marine sand and gravel resources of the Scottish Waters and the Central North Sea

This map has been commissioned by The Crown Estate. This map is to be used with the accompanying guide 'Marine mineral resources of the Scottish Waters and the Central North Sea'. British Geological Survey, 2013. Published: 2013.

Digital Cartography: J. Smalley

Compiled by S. Green, E. Campbell, T.P. Bide and P.S. Balson

AGGREGATE LICENCE AREAS

AGGREGATE LICENCE AREAS

Planning Areas

Marine Sand and Gravel Resources

Shelf break defined by 200m bathymetry contour

Median line

Limit of Isle of Man territorial waters

Licence and application areas as of March 2013

Carbonate content of sand exceeds 50%

aggregate suitable for fill

aggregate suitable for fill (coarse sand)

aggregate suitable for fill (fine sand)

Coarse aggregate

Construction aggregate (suitable insurance)

Scale 1:750 000

Areas of sand suitable for fill or sand reclamation applications where mud content is greater than 10% in the
500000

Areas of sand suitable for fill or sand reclamation applications where mud content is greater than 10% in the
500000
